

Kit for urology

The laparoscopic urology kit contains several bipolar instruments, and can—for example—be used for nephrectomies and adrenalectomies.

- Johann and Hirsch bipolar grasping forceps
- Monopolar grasping forceps with lumen
- Maryland bipolar dissection forceps
- Maryland monopolar dissection forceps, 90° angled
- Monopolar Metzenbaum scissors

Bipolar Johann

Bipolar Hirsch

Monopolar Metzenbaum

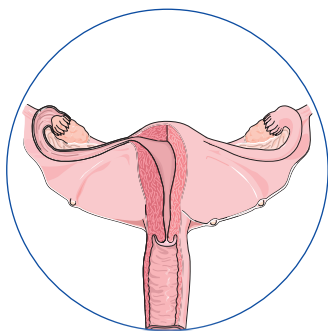

Monopolar with lumen

Bipolar Maryland

Monopolar Maryland, 90°

Kit for gynecology

The gynecology kit includes hand instruments that are helpful for laparoscopic procedures such as hysterectomies or cystectomies.

- Johann, Hirsch, and Manhes bipolar grasping forceps
- Monopolar grasping forceps with lumen
- Maryland bipolar dissection forceps
- Monopolar Metzenbaum scissors

Bipolar Johann

Bipolar Hirsch

Bipolar Manhes

Monopolar with lumen

Bipolar Maryland

Monopolar Metzenbaum
