

## HICURA Kits – the Most Popular Choice

HICURA offers a huge variety of modular parts. There are eight different-sized handles, four shafts, and more than forty different jaw inserts which are available in different lengths. Depending on the surgeon's preferences and the procedure that's being performed, basic instrumentation kits can be recommended for every area of application.

### Kit for general surgery

The general surgery kit includes those hand instruments which are most useful in standard laparoscopic procedures such as cholecystectomy, hernia repair or appendectomy.

- Johann, Clinching, Johann single action, and Croce-Olmi grasping forceps
- Maryland dissection forceps
- Metzenbaum scissors
