

Colonovideoscope

## CF-XZ1200L/I

An Innovative Colonoscope with 135x\*<sup>1</sup> Optical Magnification

20

## An Innovative Colonoscope with 135x\*1 Optical Magnification

### Optical 135x Magnification

The CF-XZ1200L/I is a state-of-the-art magnifying colonoscope that enables visualization of the finest details of suspicious lesions with up to 135x\*1 magnification. This advanced optical performance is boosted by NBI (Narrow Band Imaging) capability for even more discriminating observation, supporting increased diagnostic accuracy and confidence.

Optical 135x magnification with NBI

### High FPS (Frame Per Second) Mode

The CF-XZ1200L/I uses a sequential scanning method to produce endoscopy images. In addition, thanks to the incorporation of a proprietary CMOS chip, the CF-XZ1200L/I features a High FPS (Frame Per Second) Mode\*2 that can capture images at 120 frames per second. This helps minimize flickering and color fringing.

### Precise Magnification Control by Zoom Lever

The provided manual zoom lever allows you to manipulate the zoom lever and adjust the magnification ratio with greater precision to obtain a magnified endoscopic image that better suits your needs.

### Distal Hood MAJ-1991

For best results, we recommend use of the Distal Hood MAJ-1991. Especially helpful with magnifying endoscopes, this attachment helps maintain an optimal distance to the mucosa, thereby making it easier to stay in focus.

### Other Features

- ErgoGrip – Improved Control Section
- RIT (Responsive Insertion Technology)
- Compatible with TXI, RDI, NBI when connected to the CV-1500
- 170° wide viewing angle
- Waterproof One-Touch Connector

\*1 With OEV321UH 4K UHD LCD MONITOR. \*2 Only available when connected to CV-1500.

Specifications		
<b>Optical System</b>	Field of view	Wide: 170° Tele: 90°
	Direction of view	Forward viewing
	Depth of field	Normal : 7 - 100 mm Tele : 1 - 2 mm
<b>Insertion Section</b>	Distal end outer diameter	ø 13.2 mm
	Distal end enlarged	
<b>Instrument Channel</b>	Insertion tube outer diameter	ø 12.8 mm
	Working length	L: 1680 mm I: 1330 mm
	Channel inner diameter	ø 3.7 mm
	Minimum visible distance*3	3 mm (Normal focus mode)
<b>Auxiliary Water Channel</b>	Direction from which EndoTherapy accessories enter and exit the endoscopic image	
	Direction from which water jet appears in the endoscopic image	
<b>Bending Section</b>		Angulation range Up 180° / Down 180° / Right 160° / Left 160°
<b>Total Length</b>		L: 2005 mm I: 1655 mm
<b>Compatible System</b>		Video System Center CV-1500 Video System Center CV-290 Light Source CLV-290SL, CLV-290

\*3 Distance from the distal end of the endoscope.
